

JANET T. MILLS
GOVERNOR

STATE OF MAINE
DEPARTMENT OF AGRICULTURE, CONSERVATION & FORESTRY
PLANT HEALTH PROGRAM
28 STATE HOUSE STATION
AUGUSTA, MAINE 04333

AMANDA E. BEAL
COMMISSIONER

To: Board of Pesticides Control
From: Hillary Peterson, Integrated Pest Management Specialist
Re: Request for Funding
Date: February 18, 2022

The Department of Agriculture, Conservation and Forestry (DACF) based in Augusta, Maine and the Maine Medical Center Research Institute (MMCRI) based in Portland, Maine are two of the major mosquito surveillance agencies in Maine. Adult and larval mosquito surveillance data from all over the state has been collected for almost twenty years. Mosquito surveillance is important for early detection of vector borne diseases such as Eastern equine encephalitis, West Nile virus, Jamestown Canyon virus, and more. The DACF IPM Program monitors mosquitoes at approximately six sites per summer (early July through the end of September) in Kennebec and Waldo counties, including in Farmingdale, Augusta, Palermo, and Unity Twp. Mosquitoes are collected, sorted, identified and submitted for disease testing at State of Maine Health and Environmental Testing Laboratory (HETL) weekly, and data is entered into a secure database online for further analysis. In 2015, a mapping project was initiated by the Department of Agriculture, Conservation and Forestry to optimize the efficiency and effectiveness of surveillance of *Culiseta melanura*, the primary vector of Eastern equine encephalitis (EEE). In 2019, the habitat map was revised to include new site coordinates and updated geospatial data.

The Integrated Pest Management Program is requesting funds to assist with ongoing efforts for mosquito surveillance and identification, and continued outreach around vector-borne diseases. Assistant will be available to perform additional tasks for BPC if mosquito activity is low due to weather or other unforeseen factors. The temporary hire will also be involved with a funded grant for biological control of Swallowwort, providing early-season funds towards the position.

The IPM program is requesting a total budget of \$11,182.00 for the 2022 program. Please see the following page for a breakdown of costs.

GARY FISH, STATE HORTICULTURIST
90 BLOSSOM LANE, DEERING BUILDING

Budget Request:

Item	Rate / hr	Salary plus temp staffing fee	Hours / Week	# Weeks	Total Hours	Total \$
Summer field and lab assistant	\$15.00	\$18.57	40	14	560	\$ 10,399.20
Item	Cost / mile	Distance (miles)	# Trips	Total Miles		
Mileage	\$0.45	145	12	1740		\$ 783.00
					Total	\$ 11,182.20

Breakdown of Summer Temp Position:

Project Responsibility	Hours / Week	Start Date	End Date	# Weeks	Pay / Hr	Temp Fee / Hr	Total Pay / Hr	Total Budget for Position	State of Funding
Swallowwort	40	5/9/2022	6/19/2022	6	\$15.00	\$3.57	\$18.57	\$4,456.80	Available from Grant
Mosquito (occasional Swallowwort)	20	6/20/2022	9/23/2022	14	\$15.00	\$3.57	\$18.57	\$5,199.60	Need to request from BPC
BPC Staffing Work	20	6/20/2022	9/23/2022	14	\$15.00	\$3.57	\$18.57	\$5,199.60	Need to request from BPC

Sincerely,

Hillary Peterson,
 IPM Entomologist
 Maine Department of Agriculture, Conservation and Forestry

2021 Mosquito Monitoring Report

Results of Mosquito Trapping Conducted in the Field Season of 2021

State of Maine
Department of Agriculture, Conservation, and Forestry
Division of Animal and Plant Health IPM Program

Results of Mosquito Monitoring Conducted by Maine Department of Agriculture, Conservation and Forestry IPM Program - 2021

Two types of traps were used. At each site, 10 resting boxes (RB) and/or one CO2-baited CDC mini light trap (LT) were deployed. Traps were deployed at 6 sites:

Site Name	Town	County	State	Trap Type
Jamie's Pond	Farmingdale	Kennebec	Maine	RB
Viles Arboretum	Augusta	Kennebec	Maine	RB + LT
Garcelon WMA	Augusta	Kennebec	Maine	RB + LT
Iron Ore Point	Palermo	Waldo	Maine	RB
Beech Pond	Palermo	Waldo	Maine	RB
Unity Plantation	Unity Twp	Waldo	Maine	RB

- Mosquitoes were collected, sorted, identified and submitted for disease testing at State of Maine Health and Environmental Testing Laboratory (HETL) weekly from 7/06/21 through 9/30/21. None of the samples were found to be positive for West Nile Virus, Eastern equine encephalitis (EEE) virus or Zika virus in 2021.
- Labor: summer temporary staff member (Autumn St.Pierre): 15 weeks (@ \$15.00/hr) to deploy traps and service sites weekly for the entire season.
- Resting boxes are used to collect primarily *Culiseta spp.* mosquitoes, which are important vectors of EEE. The *Culiseta spp.* were found at five of the six sites we monitored with the highest numbers at two of the six sites. The numbers of *Culiseta spp.* collected at each weekly visit from July 1st through Sept 30th, 2021, from the 10 resting boxes deployed at each of these sites are shown below.
- The total number of mosquito species per site collected at each weekly visit from July 1st through Sept 30th, 2021, from the 10 resting boxes deployed at each of these sites, and the 2 light traps at two of the sites, are shown below. The light traps were deployed at two of the sites from Aug 10th to Sep 30th.
- Please note the absence of data for MMWR weeks 32, 34, and 35. There were unforeseen circumstances where no one was available, and the data was not able to be collected from sites those weeks.

MMWR Weeks for 2021 Field Season

Report prepared by Autumn St.Pierre, DACF, October 2021

Draft Job Description

2022 Field Technician for Mosquito and Swallowwort Biocontrol Project

BRIEF JOB DESCRIPTION: The Maine Department of Agriculture, Conservation and Forestry (DACF) has a temporary need for a seasonal laboratory and field assistant to assist with two projects on a 40 hour per week basis. The first project involves assisting in a project working to successfully introduce and establish *Hypena opulenta* as a classical biological control agent for managing the severely invasive black swallowwort (*Cynanchum louiseae*) in Maine. The second project involves mosquito trapping and testing activities for the Maine statewide mosquito monitoring program as described in DACF's "Plan for the Protection of the Public Health from Mosquito-borne Diseases". Additionally, there will be opportunities to assist the staff of the Maine Board of Pesticides Control with various tasks. The successful candidate will assist in selecting sites and servicing mosquito traps weekly, assist in mosquito identification, properly handle and label specimens using cold-chain protocol, keep records and manage data. Field sites for both projects extend from Ogunquit to Unity, Maine, and will involve driving up to 1.5 hours at a time. Work will be based in Augusta, Maine.

KNOWLEDGE/SKILLS/ABILITIES: Education and experience in biology, with priority given to experience and training in insect identification and/or plant identification; Project management & implementation, including record-keeping, time management, and ability to communicate with superiors and collaborating laboratories with routine sample drop off dates and times; Ability to use Microsoft Office applications including Word, Excel, and Outlook, with priority given if able to conduct simple data analyses within spreadsheets (simple formulas, creating graphs, copying graphs and tables from Excel to Word) and comfort writing technical reports; Comfort with field and laboratory conditions, including handling live insects (specifically mosquitos and caterpillars), ability to conduct good recordkeeping while in the field (data sheets will be provided), ability to traverse uneven ground while carrying approximately 15-20lbs of equipment (field sites are within the woods), ability to drive to coordinate locations and follow instructions to find remote field sites, comfort with handling dry ice, and experience with use of a dissection microscope. Assistant will be trained in identification and field skills where lacking.

MINIMUM QUALIFICATIONS: Candidates must have a valid driver's license and be at least 18 years of age.
