REQUIRED INFORMATION

Pursuant to Minor Revision license #S-020700-WD-CM-M:

- The applicant shall submit on a Department-approved form the calculated OBW limit as well as a discussion of relevant factors that may impact the proposed OBW tonnage to the Department by January 31st of each calendar year.
- The annual OBW limit shall not exceed 85,000 tons regardless of the outcome of the methodology.

Please fill out the required information below and submit the document to the Department no later than January 31st.

1. Current OBW limit: 85,000 tons/year Year of Current Limit: 2023
2. Proposed OBW limit: 85,000 tons/year Year of Requested Limit: 2024

3. Calculation of annual OBW limit using the approved formula (average OBW tonnage over the previous five years multiplied by the average Consumer Price Index (CPI) over the same five-year period):

Year	2019	2020	2021	2022	2023
OBW Tons	84,554	86,035	82,435	79,172	78,673
CPI	2.3	1.4	7.0	6.5	3.4

5-year OBW avg: 82,174 x 5-year CPI avg: 4.1 = 85,543 tons OBW calculated

4. Discussion of relevant factors that may impact the proposed OBW tonnage including available technology, economic factors, and other applicable factors. Supporting information is required if the proposed OBW limit in #2 is different than the calculated OBW limit in #3:

Applicant's Response:

The applicant expects similar municipal sludge volumes will need disposal at Juniper Ridge Landfill (JRL) in 2024. Due to strict guidelines set by the legislature regarding PFAS, JRL has become the primary disposal site for much of Maine's sludges.

As stated by the Maine Department of Environmental Protection in the JRL solid waste license minor revision #S-020700-WD-CM-M and agreed upon by the applicant, Oversized Bulky Waste (OBW) is a viable and consistently reliable bulking material for sludge that results in improved stabilization and lower hydrogen sulfide gas production than Construction Demolition Debris.

As experienced in February 2023, a lack of consistent reliable bulking material can result in operational issues at the landfill if sludge volumes needing disposal are high enough. For those reasons, the applicant believes that an increase to JRL's OBW limit for the expansion area in 2024 is warranted.
