Please note there are **no federal or industry consensus standards** in the United States for devices used to secure children in ambulances. Each manufacturer determines if and how their own device will be tested. Prospective purchasers should contact the manufacturer for if and how their device(s) were crash-tested. Manufacturer's instructions for cleaning their products should be followed in order to retain product integrity.

There are **no criteria** for products to be included in this list.

A product's inclusion **does not imply** that it is deemed "safe" or that is recommended by NASEMSO, the Safe Transport of Children Committee, or any agency or entities thereof.
